Industrial Manufacturing companies continue to compete for market share around the world as they innovate and optimize unique solutions to solve for customer needs. To stay competitive, they must continue to invest in upgrading their IT and ERP infrastructure.

Some of the current issues facing renewable industrial manufacturers today include:

- Relying on spreadsheets
- High operational costs
- Inability to accurately track project KPIs
- Multiple bolt-on solutions
- Manual exchange of information
- On-premise outdated systems
- Lack of visibility into key metrics

**"I really appreciate that NetSuite's always changing. It's a nimble and adaptable system, and they're always making updates."** *T3 Micro, Industrial Manufacturing Client*

## How Caravel Can Help

|   |  |
|---|--|
| <p><b>FINANCIAL MANAGEMENT</b></p> <p>NetSuite simplifies financial management for industrial manufacturers by providing customized financial reports, streamlined accounts receivable, accounts payable, and general ledger processes. It also offers real-time views into budgeting, expense allocation, and automated amortizations.</p> | <p><b>MATERIALS RESOURCE PLANNING</b></p> <p>NetSuite MRP enables accelerated production by meeting demand for raw materials, components, and subassemblies based on bills of materials and expected dates of completion. Users can utilize What-If Scenarios and the Planners Workbench for more consistent and timely procurement decisions.</p> |
| <p><b>ENGINEER TO ORDER</b></p> <p>NetSuite's native integration with CAD tools and Open APIs for customized flows facilitates building out item masters and bills of materials, creating work orders and routings, and providing step-by-step instructions to manufacturing teams.</p>   | <p><b>PROJECT MANAGEMENT</b></p> <p>The project management for installation management feature enables teams to monitor project status, time entry, and expenses. It also allows for maintaining project resources and their costs, leading to up-to-date project financials for review at any time.</p>   |
| <p><b>DEMAND PLANNING – TIME PHASED</b></p> <p>NetSuite's time-phased planning feature is used to plan inventory replenishment and minimize downtime on customer orders by calculating all supply needed to cover demand in the current cycle.</p>  | <p><b>WIP AND ROUTING</b></p> <p>Manufacturing companies can use NetSuite's WIP and Routing functionality to define the manufacturing process, resources needed, necessary time, and expected cost. This leads to a real-time scheduling process plan with designated work centers and cost templates.</p>   |
